ONE TOOL. ONE PASS. ONE RESULT.

The Ground Hog® enables arena owners and rodeo event dirt crews to not only rework the surface with hydraulically operated ripper shanks but also fill in those holes made by performance horses and livestock.

LUCAS METAL WORKS® GROUND HOG® ARENA TOOL

The **Ground Hog® Arena Tool** was designed in 1996 by our founder Raymond Lucas, who was an avid arena owner himself and was not satisfied with the arena grooming tools available on the market at the time. Raymond desired to have one tool that could groom the arena ground in one pass and produce the same consistent result, safely and flawlessly, every time.

The **Ground Hog® Arena Tool** enables arena owners and crews to not only rework the surface with the unit's hydraulically operated ripper shanks, but also fill in those holes made by performance horses and livestock. This is accomplished the unit's double grader blades and pegged finishing roller to compact and finish the ground safely for the horses and rider.

Multiple Uses - Not just limited to rodeo arenas, the **Ground Hog® Arena Tool** can also be used to drag winter-time feeding ruts in pastures, rework gravel on driveways, or used for landscaping purposes.

The **Lucas Ground Hog®** is available in seven versatile sizes and two eye-catching colors. **The Ground Hog® Arena Tool** is nationally recognized and preferred as the arena drag tool of choice at various major arena events all across North America. Horses love it, riders trust it! One pass, one tool, one result equals one flawlessly conditioned ground, every time.

AVAILABLE IN TWO COLORS
BLUE BLACK

LUCAS METAL WORKS® WATERING SYSTEM

Maintain. Control. Prevent. The **Ground Hog® Watering System** was developed to maintain in the moisture content in the arena during the event, thus providing consistent ground throughout the entire event. This eliminates the unfair advantage of the ground becoming faster or slower for those who draw up late in the event.

The **Watering System** comes standard with two 55-gallon tanks that are operated by two 12-volt water pumps that distribute the water evenly from six spray nozzles. The unit is controlled by a dual-lever switch box that can be turned on and off from the convenience of the seat of the operator's tractor.

The unit is now available to be mounded on 7', 8', 9', 10', & 12' **Ground Hog® Arena Tool** models and is available in two colors. **Note** - when the watering system is mounted to your **Ground Hog® Arena Tool** with full tanks of water, approximately 1000 lbs. is added to the total weight of the unit.

AVAILABLE IN TWO COLORS | **GROUND HOG® SOLD SEPARATELY**
