## LUCAS PALLET FORKS™

**MOVE  
BULKY MATERIAL  
WITH EASE**

Needing to move palletized, bagged, or bulky material safely? Available in two attachment options, the Lucas Pallet Forks are your safest solution to loading and unloading these materials at your project. The unit comes standard with 48" heavy-duty hardened steel forks. In addition the unit has a locking fork width feature to adjust the hardened steel forks for the optimal position of the forks on each load of material. This feature allows for the unit to safely load and unload up to 4,000 pounds of material per load. No matter the type of project rather for farm chores or unloading pallets of building materials the Lucas Pallet Forks are your safest solution for moving palletized, bagged, or bulky material at your project. Hook up the implement, secure the forks to the optimal width for your project, and get back to work. Another project another Lucas solution.
