LUCASMETALWORKS.COM

Lucas Metal Works steel buildings are built to last! We offer both residential and commercial structures of all kinds, along with barns, arenas, sheds and even mini-storage buildings. If you have a need for pre-engineered/pre-fabricated metal structure, we will design, manufacture and ship it to your location based on your needs and wants.

Over the years, we have mastered the skill of fabricating steel into sturdy, long lasting structures that have surpassed the test of time. Our buildings are not only uncomplicated to erect, they are virtually maintenance free once completed. At Lucas, our experienced sales force is ready to get you started on your new metal structure. All you have to do is give us a call at 866-689-8904. Or, email us at info@lucasmetalworks.com.

Lucas roofing materials have a 40-year warranty. Our panels are available in a variety of beautiful colors to enhance the look of your home and property with minimal fading over time (see warranty). Lucas Panels are available in a variety of gauges, are Energy Star rated and have a wind rating of 150+mph. In addition, our roofing panels are certified in accordance with UL-2218 (Standard for Impact Resistance) and UL-790 (Standard for Fire Tests). By choosing Lucas Roofing Materials you are choosing top quality.

At our Ochelata office, we also provide retail sales to our customers with a full line of dependable building components and accessories. Call or come by to speak to a retail specialist. We'll get you what you need.

Lucas Metal Works has a complete line of farm and ranch equipment. We offer a wide range of farming tools and accessories that include pallet forks, hay spears, bale unrollers, grapples and heavy duty grapples, heavy duty pullers, scrapers and rock buckets, with over 50 years of expertise backing every piece we manufacture. Our line of Lucas equipment is available all across the U.S. from authorized Lucas Equipment Dealers, and even in Canada. Just give us a call for a dealer nearest you.

In addition to our farm & ranch line, we manufacture the nationally recognized Ground Hog™ Arena Tool. The result of one pass with this tool is a flawlessly conditioned ground. Our Ground Hog™ Arena Tool is also available at authorized Lucas Ground Hog™ dealers across the U.S. Call Lucas Metal Works to learn of a dealer nearest you, 866-689-8904.

All of our products are designed and manufactured here in the heart of America. Our central U.S. location in Northeast Oklahoma enables ease of reach to and from all over the United States. We are proud to have satisfied customers from coast to coast, as well as in to Canada.

Lucas Metal Works' is committed to meeting the needs of our customers. Our response is guided by our appreciation and loyalty to the customer and we have proven to always go "above and beyond" to insure excellent service before, during and after each sale.

We take pride in the fact that we are big enough to handle the large jobs, and still small enough to call our customers, "friends".

Lucas Roofing, Lucas Equipment and Lucas Ground Hog™ are all divisions of Lucas Metal Works.

40 Year Paint Finish Limited Warranty

WEATHERXL™ LIMITED WARRANTY

Company
Address
Address

We are pleased to present you with THE FOLLOWING Limited Warranty on our WeatherXL™ Siliconized Polyester coil coatings.

1. This Warranty applies if any of the following Warranty Conditions occurs:

- a) Within 40 years from the date of application of the paint, WeatherXL exhibits cracking, flaking or peeling (loss of adhesion) to an extent that is apparent on ordinary outdoor visual observation. *Minute fracturing, which may occur in proper fabrication of the building parts, is not a covered Warranty Condition. Failure due to substrate corrosion is not a covered Warranty Condition.*
- b) Within 30 years from the date of installation of the panels, WeatherXL:
 - i. Chalks in excess of ASTM D-4214 method A number six (6) rating on horizontally installed (roofing) panels and a number eight (8) rating on vertically installed (sidewall) panels, when properly maintained as described herein, and
 - ii. Changes color more than seven (7.0) Hunter delta-E units on horizontally installed (roofing) panels and five (5.0) Hunter delta-E units on vertically installed (sidewall) panels as determined by ASTM method D-2244. Color change shall be measured on an exposed painted surface that has been cleaned of surface soils and chalk, and the corresponding values measured on the original or unexposed painted surface. Color changes may not be uniform on surfaces that are not equally exposed to the sun and elements and LUCAS METAL WORKS does not warrant that color changes will be uniform.
 - iii.

2. If a Warranty condition occurs and the other requirements of this Warranty are met, LUCAS METAL WORKS will supply you with the following Warranty benefits:

LUCAS METAL WORKS will pay for labor and material reasonably necessary to repaint, repair or replace, at our option, the metal panels showing the Warranty Conditions. The Warranty Benefits shall not exceed the original purchase price of the affected metal panels (not including any accessories or attachments) or the remedy provided in any other warranty provided to the building owner, whichever is less, even if our limited warranty fails of its essential purpose. This Warranty will continue to apply to any metal panels that were repainted, repaired or replaced due to a Warranty Condition, but only for the unexpired portion of the Warranty period applicable to the original part.

3. LUCAS METAL WORKS cannot control the circumstances of application. Therefore, this Limited Warranty applies only when WeatherXL coil coatings are properly applied (according to the application instructions in Valspar's then-current Technical Data Sheet) to a properly pre-treated and primed substrate (HDG Steel (G90/G60), Galvalume, and Aluminum) that is fabricated into commercial or industrial building parts. LUCAS METAL WORKS does not warrant the use of WeatherXL coil coatings with non-Valspar coatings. Warranty Benefits are available only for all-Valspar coating systems. Also, because some colors may not meet our standards, LUCAS METAL WORKS will inform you in writing at the time of color matching if the color you have selected is not an approved color.

4. To receive Warranty Benefits for a Warranty Condition, you must:

- a) Send written notice of the Warranty Condition within thirty days of the appearance of any detectable defect to: PRESIDENT, LUCAS METAL WORKS.
- b) Provide access to the affected panels and site.
- c) Assist us as necessary in determining the exact cause of failure.
- d) Provide such documentation as we shall request to confirm the Warranty Condition, including records sufficient to identify the batch number and application date of the WeatherXL coating involved; and production records and quality control records from your coater showing compliance with our application specifications and the results of tests required by those specifications.

5. We are not responsible and provide no Warranty Benefits, for any damage or condition resulting from circumstances beyond our control, including any of the following:

- a) Acts of God, falling objects, explosions, fire, external forces or other such similar or dissimilar circumstances beyond LUCAS METAL WORKS' control
- b) Harmful fumes or foreign substances in the atmosphere, or salt spray
- c) Failure to apply WeatherXL coil coatings in accordance with VALSPAR specifications and instructions as outlined on their then-current published technical data sheets;
- d) Improper treatment or defects in the substrate metal or in its fabrication, embossing. Any corrosion or loss of adhesion as a result of the embossing process;
- e) Significant differences in insulation below coated metal panel;
- f) WeatherXL which has been damaged due to moisture entrapment in coils and/or bundles during transit or storage or which has been stored or installed in such a way that allows standing water on the coating;
- g) Failures or damage resulting from corrosion at cut/bare edges or failure of the metal substrate;
- h) Development of any other condition between the coating and the substrate which causes the coating to degrade or delaminate, including any failure or deficiency in the cleaning process or pretreatment;
- i) WeatherXL that has been stored/installed in such a way that allows contact with animals or animal waste.
- j) Mishandling of WeatherXL or of any substrate coated with it, including abuse, alteration, modification, improper use, or storage;
- k) Where materials / items such as snow guards and solar panels are attached / adhered to the product;

6. No Warranty is provided for WeatherXL on any substrate that is subjected to sea spray or installed on property located 1,500 or fewer feet from a salt-water environment.

7. If chrome free pretreatment is used, warranty for adhesion must be validated by sample testing of production material. Material must pass AAMA 2605 sec. 8.4.1.4 Boiling Water Adhesion. Following topcoat application, a sample must undergo a twenty (20) minute boiling water immersion crosshatch; sample within 5 minutes of removal from the boiling water/evaluate adhesion in the cross hatched area per AAMA sec. 8.1.1.2 Tape Pull-Off (ASTM D3359 Method B)/Result must be 5B, no tape off. Use of chrome free pretreatment with Galvalume voids warranty.

8. This warranty applies only to building parts installed on buildings within the Continental United States, Alaska and Canada. This Warranty will automatically expire upon any change or transfer of ownership of the property on which the metal coated with WeatherXL is originally installed.

9. This is our only warranty concerning WeatherXL Siliconized Polyester coil coatings. Except for this Warranty, WE MAKE NO WARRANTIES, EXPRESS OR IMPLIED AND DISCLAIM ALL IMPLIED WARRANTIES INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR FREEDOM FROM PATENT INFRINGEMENT. LUCAS METAL WORKS WILL NOT BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES. We have no other liability with respect to WeatherXL Siliconized Polyester coil coatings, whether based on warranty, negligence or any other legal theory.

10. This is our complete warranty. It lists all of Valspar's obligations regarding WeatherXL Siliconized Polyester coil coatings purchased by you on or after the effective date shown below, and this warranty is honored by LUCAS METAL WORKS. It is only for your benefit and you may not assign it to any other person or entity. LUCAS METAL WORKS makes no warranty to your customers and is not responsible for any warranty you choose to provide to your customers concerning the performance of WeatherXL Siliconized Polyester coil coatings. LUCAS METAL WORKS may change or discontinue this Warranty by providing you with 30 days advance written notice. Any changes will apply only to WeatherXL Siliconized Polyester coil coatings sold to you after the notice period expires. This warranty shall be governed by OKLAHOMA LAW, but not its conflict of law rules.

IN WITNESS WHEREOF, Lucas Metal Works and Customer have executed this Warranty effective as of this

DRIPSTOP

Condensation control

**DripStop Has Become the World's
Best-Selling Condensation Control Product
By Being a Faster, Cheaper & More Durable Solution.**

Helps Fight Corrosion

Tests have shown that it adds another layer of protection specifically from the corrosive elements in livestock confinement.

Helps Fight Injury on the Job site

Reduces risk of falling while walking on top of insulation on the roof frame. Cutting the time on the roof by up to half means less risk to you and your workers.

Durable

Very difficult to cut or slice through, which makes it ideal for self-storage applications

Fight Condensation Without Insulation

Don't Go To The Time And Expense Of Laying Down Insulation And Vapor Barrier When You Are Just Trying To Stop Condensation

FIRE TESTING
APPROVED

For more information visit www.dripstop.com
email info@dripstop.com
or call 1-(937) 666-6646

FILC

HOW IT WORKS

When climate conditions cause condensation to occur, DripStop absorbs and holds that moisture in specially designed pockets in the membrane. When climate conditions go back above the dew point, the moisture is released back into the air as normal humidity.

The bond holding the water is so strong, that even at forty-five degree slope it still holds 26 ounces of moisture! DripStop can hold more than one quart of water per ten square feet of roof space.

Advantages

Arrives At The Job site Already On The Steel – Saves You Money – Saves You Time

No more labor costs for installing insulation. It completely cuts out one step of the building process, and up to half the time on the roof.

It can allow you to work on the roof when wind and weather conditions would keep you off it.

What Are Builders Saying About DripStop?

"I have never had one complaint... We have done over 300 buildings and I have been back to 75 - 100 and they all love it"...

--- Ohio builder

"With double bubble or insulation, you take twice as much time. You have to lay down the insulation, and then you have to lay down the steel."

--- Minnesota builder

"We have had no complaints, no dripping, no issues, customers seem to really like it..."

--- Illinois builder

"On windy days, you can still run roof."

--- Wisconsin builder

Areas of Use

- Post Frame/Agricultural Buildings
- Steel Buildings
- Self-Storage
- Workshops/Unattached garages
- Open Walled Structures like carports/truck and RV storage

Where decking/liner panel is installed below a pitched metal roof and insulation is blown in, DripStop prevents condensation from damaging insulation and pooling on metal.

Ask your roll former about DripStop or if you want more information please contact info@dripstop.net we can find a roll former already using DripStop in your area.

DRIPSTOP

Condensation control

Keep Everything Under Your Roof Dry.

DripStop Controls Condensation on Uninsulated Metal Roofs.

- Helps fight corrosion
- Easy to clean
- Stops bird nesting troubles
- Reduces rain noise
- Durable, rip & tear resistant
- Saves money on installation
- Cuts down on time of construction
- Reduces risk of injury during installation

One of the defining properties for any building is keeping the contents safe from the elements. If condensation from your metal roof is causing the contents to be rained on, your structure is not providing this basic function. DripStop condensation control membrane is a cost effective solution for preventing dripping caused by condensation.

Whether you are protecting livestock or equipment, DripStop is a name that you can trust. Years of experience have helped us to develop an excellent product for keeping your shelter dry.

Areas of Use:

- Post frame/agricultural buildings
- Steel buildings
- Self-storage
- Workshops/unattached garages
- Open walled structures
- Carports, truck ports & RV storage

Fight Condensation Without Insulation

Don't go to the time and expense of laying down insulation and vapor barrier when you are just trying to stop condensation.

Helps Fight Corrosion

Tests have shown that DripStop adds another layer of protection specifically from the corrosive elements in livestock confinement.

Maintenance and Worry Free

Once installed, DripStop provides worry free condensation control because it is anti-microbial, mold and mildew resistant.

DripStop Won't Rip or Tear, Flake or Peel & Birds Can't Damage or Nest in it.

Builders

DripStop has become the world's best-selling condensation control product by being faster, more cost effective and more durable.

Arrives At The Job site Already On The Steel. Saves You Money - Saves You Time

No more labor costs for installing insulation. It completely cuts out one step of the building process, and up to half the time on the roof.

It can allow you to work on the roof when wind and weather conditions would keep you off it.

Helps Fight Injury on the Job site

Very difficult to cut or slice through, which makes it ideal for self-storage applications.

How it Works

When climate conditions cause condensation to occur, DripStop absorbs and holds that moisture in specially designed pockets in the membrane. When climate conditions go back above the dew point, the moisture is released back into the air as normal humidity.

The bond is so strong that DripStop holds more than a quart of water per ten square feet of roof. Even at a 45 degree slope it holds 26 ounces.

LUCAS METAL WORKS

Don't you just hate CONDENSATION in your metal structure???

One of the defining properties for any building is keeping the contents safe from the elements, don't you agree?

The DripStop condensation control membrane is a cost effective solution for preventing dripping caused by condensation. Once installed it provides worry-free condensation control because it is anti-microbial, mold and mildew resistant. It not only fights condensation without insulation, it helps fight corrosion often found in livestock confinement.

This amazing product "DRIPSTOP" can be used in post frame/ag buildings, steel buildings, self-storage, workshops/unattached garages, open walled structures, carports, truck ports, and RV storage.

It is very difficult to cut or slice through, it won't rip, tear, flake or peel and the best part is: birds can't damage or nest in it. ☺

Installation is done at the factory! Your panels will arrive at the job site with DRIPSTOP already installed on them.

DRIPSTOP – It's a Necessity.

Come by to check out our newest products in person and get a quote. You won't be disappointed!

Or give us a call at Lucas Metal Works 866-689-8904. We're always standing by to help you!

We look forward to hearing from you!

Lucas Metal Works is offering something new!

Perforated Liner Panels

These panels are designed for improved sound reduction! Who doesn't want some peace and quiet? ☺

This new product consists of 29GA, Sturdi-Rib, White only.

Once installed, these liner panels add the following benefits:

- Add acoustical value
- Reduce echoing
- Protect insulation backing

Call us right away for pricing! ☺

Or, come by to check out our newest products in person and get a quote. You won't be disappointed!

Call 866-689-8904. We're always standing by to help you!

We look forward to hearing from you!

INSTALLATION RECOMMENDATIONS

MAXX STEELBINDER (Cupped Head Sealers) & HWH STEELBINDER Sealers & KWIKSEAL MB WOODBINDER

FOR PROPER APPLICATION, THE USE OF IMPACT DRIVERS ARE NOT RECOMMENDED ON ANY PAINTED FASTENER

1. Select the proper screw gun for installing self-drilling fasteners.

RECOMMENDED SCREW GUNS* W/DEPTH SENSING NOSE PIECE.

MAXX STEEL BINDER			HWH STEELDINDER & KWIKSEAL II WOODBINDER			
MANUFACTURER	MODEL	AMPERAGE	RPMS	MODEL	AMPERAGE	RPMS
MILWAUKEE	6790-20	6.5	0-2500	6790-20	6.5	0-2500
DEWALT	DW266	6.5	0-2000	DW266	6.5	0-2500
DEWALT	DCD780	N/A	0-2000	DCD780	N/A	0-2000
BOSCH	S25MT	7.0	0-2500	SG25MT	7.0	0-2500

*For use in installing all self-drilling fasteners from #6 through #1/4 diameters. Tool speed as high as 2500 RPM can be used for #6 through #10 diameters in softer materials. Do not use 4000 RPM drywall guns.

**FOR PROPER APPLICATION, THE USE OF IMPACT DRIVERS ARE NOT RECOMMENDED ON ANY POWDER COATED FASTENER.

2. Set the magnet in the driving socket to the proper depth. Socket must bear securely on the hex washer face of the fastener.

3. Use depth sensing nosepiece on screw gun to allow proper seating of fastener. Do not overdrive. (See illustration.)

	MAXX STEELBINDER	HWH STEEL BINDER & KWIKSEAL MB WOODBINDER
CORRECT Sealing material slightly visible at edge of metal washer. Assembly is weather tight		
UNDERDRIVEN Sealing material not compressed, assembly loose.		
OVERDRIVEN Sealing material extruded beyond edge of washer, washer deformed.		

4. Drive fastener perpendicular to surface.

MAXX STEELBINDER		HWH STEELBINDER & KWIKSEAL MB WOODBINDER	
CORRECT	INCORRECT	CORRECT	INCORRECT

5. Select extension cords with the correct wire size. See table below.

RECOMMENDED MINIMUM WIRE GAUGE* FOR EXTENSION CORDS

RATED AMPERES (TOOLS)	EXTENSION CORD LENGTH					
	25'	50'	75'	100'	150'	200'
Through 5	16	16	16	16	12	12
5.1 – 8.0	16	16	16	16	10	-
8.1 – 12.0	14	14	14	10	-	-
12.1 – 15.0	12	12	10	10	-	-

*Tool manufacturer's recommended size based upon limiting the line voltage drop to five volts at 150% of the rated amperes.

6. Do not force the fasteners. Apply only enough end pressure to allow drill point to cut efficiently.
